Direct Drive Rotary Tables

HIWIN RCV rotary tables

5. HIWIN RCV rotary tables

5.1 Properties of RCV rotary tables

RCV rotary tables are directly driven, maintenance-free precision axes. They use water-cooled torque motors from the TMRW series, guaranteeing high levels of acceleration and torque. Equipped with various high-resolution encoders, the rotary tables achieve accuracies of just a few arc seconds and can be integrated into all standard control concepts. Featuring crossed roller bearings, the tilt-resistant mechanical design is able to accommodate maximum loads.

Key features:

- Plug-and-play rotary table ready for installation
- Maintenance-free direct drives
- High acceleration, torque and accuracy
- Tilt-resistant mechanical design with large diameter
- Extremely rigid crossed roller bearings
- Integrated clamp
- With option of tailstock as additional support bearing

Typical applications:

- Additional rotary axis in machine tools
- Laser processing machines
